

SilverLining™

Enterprise-Level Cloud Services

Get What You Need
Pay for What You Use
Save Money. Period.

SilverLining™ Cloud Services benefits:

- Resource on-demand
- Pay only for what you use
- Accessible, reliable, secure
- Scalable and elastic
- Reduced IT costs

FORETHOUGHT.net SilverLining™ is a powerful enterprise-level cloud computing solution — with redundant back-up, fault tolerance and disaster recovery — that enables companies to focus on their business, not their technology.

SilverLining provides secure, reliable, flexible Fortune-500 Enterprise Grade IaaS services for any size organization at a fraction of the cost of other solutions. In addition to email services, collocation and data backup, SilverLining supports virtual desktops, collaboration, file servers, hosted firewall, bandwidth-intensive databases, and website hosting.

Companies that choose FORETHOUGHT.net cloud computing service can:

- Utilize affordable and scalable IT services without upfront costs
- Choose customized services based on business needs
- Pay for only the services used
- Access data and voice solutions anywhere, anytime with just an Internet connection
- Ensure business continuity in any adverse event; fault tolerance and disaster recovery systems are built-in
- Reduce lost productivity and downtime waiting for costly new hardware or expensive software upgrades
- Simplify office moves from one location to another
- Enjoy hassle-free maintenance and support
- Install and enjoy a full-featured business phone system without high equipment costs.
- Switch on or off most services on the fly, with little to no office disruption

For more than 17 years, businesses have trusted FORETHOUGHT.net commitment to the highest level of technical expertise, security, reliability, and responsiveness. FORETHOUGHT.net makes complex technology solutions simple.

About FORETHOUGHT.net

FORETHOUGHT.net is a leading locally owned and operated IT and communications service provider, offering a portfolio of enterprise-level cloud-computing, Internet, voice and data solutions so you can focus on your business, not your technology. Established in 1995, FORETHOUGHT.net provides superior high-performance technology, scalable services and world-class support at a fraction of the expense of traditional models. This commitment to the highest level of technical expertise, security, reliability and responsiveness results in high client loyalty and satisfaction.
